FS-5000HD FLOOR SCALE

High Precision, Heavy Duty, Low-Profile Floor Scale

Durability You Can Depend On

The FS-5000HD's best-in-class features deliver more reliability and higher performance than ever before. Available in 1000 to 10,000 lb capacities, the FS-5000HD is the industry leader for high precision weighing in Legal-for-Trade applications.

Engineered Accuracy and Longevity

Minimizing deck deflection and isolating load cells from extraneous forces are key to low-profile scale accuracy and long life. As a result, the FS-5000HD's design concept provides outstanding strength and component protection. All load cells are recessed within the structural channel frame and all load cell cables are protected inside the channel or sheathed with braided stainless steel on the home run cable, reducing damage from rough handling, rodents or other hazards. The FS-5000HD's NEMA 4X stainless steel junction box is protected from forks and industrial abuse by a 6-inch structural steel channel frame and diamond treadplate safety deck. The junction box is mounted into the structural frame for efficient setup and service access. What's more, the FS-5000HD is backed by a five-year limited warranty.

We offer a broad range of platform sizes and scale capacities ranging from 3'x3' to 5'x7' and from 1000 pound to 10,000 pound capacities.

Expanded Accuracy

Choose Kanawha's digital weight indicators for accurate weight readings every time.

STANDARD FEATURES

- Four NTEP certified alloy steel shear beam load cells
- Unique "integral" junction box
- Heavy-duty industrial design
- Rugged diamond safety treadplate deck
- Rigid, heavy duty structural steel channel frame
- Four adjustable stainless steel support feet
- Four drilled deck holes for scale height adjustment
- 20 ft hostile environment home run load cell cable
- 5-year limited deck warranty and 2-year limited electronic parts warranty

OPTIONS

- Floor anchor plate, mild steel (set of two)
- Stainless steel load cells and hardware
- Welded seal stainless steel load cells and hardware
- Epoxy paint
- Forklift channel options
- Access ramps and pit frames

"We keep 4'x4' - 5000 pound capacity scales in stock, ready to deliver and install today!"
