

Solutions Spotlight – Boise Cascade

The Company

Boise Cascade manufactures engineered wood products, plywood, lumber, and particleboard and distributes a broad line of building materials, including wood products manufactured by the company's wood products division.

The Challenge

Boise Cascade recognized a need to improve the way they were storing wood sealant. They needed to minimize their use of bulk cube storage.

The Solution

The KSS Sales team proposed weighing the cylinder storage tank in pounds and gallons with high accuracy using the RL9000 TWM. These units are rugged, precise, and have a low profile. A four-module kit was equipped with everything Boise Cascade needed, and for a competitive cost. The RL1280 indicator was also used as it comes standard with all the functions they needed: it was programmable, has built in Wifi and network capabilities as well as its own IP address, and is accessible from anywhere via a smartphone.

The Result

Our solution streamlined Boise Cascade's bulk storage process and created real-time inventory management and tracking. Additionally, an automated sealant ordering process was realized and there is future growth potential for using the existing indicator with another scale system.
