

COAL & MINING

Scales and custom solutions for efficient and profitable coal mining and processing.

In your industry you have to maximize production and constantly improve efficiency. We offer truck scales tough enough to last in the harsh conditions found in mines and to help alleviate overloaded trucks hauling on the roads. We can provide railroad scales with low cost in-motion or static weighing options that help reduce under or over filling, uneven loading, and rejected deliveries. Analyzers can determine the quality of coal as it moves on a conveyor system. Kanawha Scales & Systems is the world leader in the design and manufacture of automated truck and railcar batch loading systems for fast, efficient bulk materials loading operations.

24/7 SERVICE

KSS provides emergency repair and maintenance service 24 hours a day, 7 days a week, year round. Technical phone support is provided any time you call, every time you call.

CALIBRATION & REPAIR

Standard repairs, emergency repairs, and regularly scheduled contractual maintenance - we'll be there. Calibrations are performed to NIST Handbook 44 standards to ensure your scales are accurate.

REPORTING

WebView+ gives you web access to your scale info, repair histories, and calibration certificates. Download custom reports, determine budgetary needs, and place service calls online with our reporting portal.

TECHNICIAN TRAINING

Our service technicians are factory trained and state registered where applicable. They participate in our intense training program, designed to ensure they are knowledgeable in all aspects of the weighing industry.

Turn investment into profit! Kanawha Scales' coal and mining industry weighing solutions make a measurable difference.

TRUCK SCALES, DATA COLLECTION SYSTEMS & SCALESIDE HARDWARE

We offer many rugged and efficient truck scale brands, and a full line of attended or fully automated systems for your shipping or receiving operations. Make your truck scale operations more efficient and the data readily available in meaningful and timely reports!

RAIL SCALES & DATA COLLECTION SYSTEMS

Rail scales can withstand continuous heavy loads and challenging environments year after year. We offer in-motion and static rail scales, pitless models, certified and non-certified models. Many of the rail scales we can offer are NTEP approved Legal-For-Trade.

BELT SCALES

Weigh and measure the flow rate and production of materials in-motion, assuring that you are meeting production output goals and experiencing no downtime for weighing. KSS can customize and integrate belt scales and accompanying systems specifically to your needs, giving you the ability to measure flow rate and total production.

ASH ANALYZERS

Obtain realtime, continuous data on the total ash content in your coal. We offer on-belt analyzers suitable for both raw coal and washed coal where ash chemistry is relatively stable and the depth of the coal does not exceed 14 inches.

WHEEL LOADER SCALES

Wheel loader scales provide onboard weighing to improve your efficiency in loading accurately and hauling legally. These heavy-duty onboard scales and our related systems work together to track the loading of any transfer vessel. They are accurate, dependable, and convenient.

CUSTOM APPLICATIONS

Our expertise exceeds industrial scales and weighing applications. Our Technical Services team specializes in process control, material handling, and data management applications. Around the world, we deliver customized solutions that ensure efficient and cost-effective ways of doing business.
