AGGREGATE INDUSTRY

Scales and custom solutions for efficient and profitable aggregate industry operations.

Operating a quarry or aggregate pit means gravel, sand, stone, or asphalt are constantly being moved and measured around your facility. With weighing equipment constantly outdoors in the weather, and always in use, rugged construction and reliability are key. Truck traffic flow must be smooth and efficient and load measurement must be accurate. Our weighing experts can provide the top products to increase efficiency and safety in measuring and handling aggregate production.

24/7 SERVICE

KSS provides emergency repair and maintenance service 24 hours a day, 7 days a week, year round. Technical phone support is provided any time you call, every time you call.

REPORTING

WebView+ gives you web access to your scale info, repair histories, and calibration certificates. Download custom reports, determine budgetary needs, and place service calls online with our reporting portal.

CALIBRATION & REPAIR

Standard repairs, emergency repairs, and regularly scheduled contractual maintenance - we'll be there. Calibrations are performed to NIST Handbook 44 standards to ensure your scales are accurate.

TECHNICIAN TRAINING

Our service technicians are factory trained and state registered where applicable. They participate in our intense training program, designed to ensure they are knowledgeable in all aspects of the weighing industry.

Turn investment into profit! Kanawha Scales' aggregate weighing solutions make a measurable difference.

TRUCK SCALES, DATA COLLECTION SYSTEMS & SCALE-SIDE HARDWARE

We offer many rugged and efficient truck scale brands, and a full line of attended or fully automated systems for your shipping or receiving operations. Make your truck scale operations more efficient and the data readily available in meaningful and timely reports!

RAIL SCALES & DATA COLLECTION SYSTEMS

Rail scales can withstand continuous heavy loads and challenging environments year after year. We offer in-motion and static rail scales, pitless models, certified and non-certified models. Many of the rail scales we can offer are NTEP approved Legal-For-Trade.

BELT SCALES

Weigh and measure the flow rate and production of materials in-motion, assuring that you are meeting production output goals and experiencing no downtime for weighing. KSS can customize and integrate belt scales and accompanying systems specifically to your needs, giving you the ability to measure flow rate and total production.

WHEEL LOADER SCALES

Wheel loader scales provide onboard weighing to improve your efficiency in loading accurately and hauling legally. These heavy-duty onboard scales and our related systems work together to track the loading of any transfer vessel. They are accurate, dependable, and convenient.

CUSTOM APPLICATIONS

Our expertise exceeds industrial scales and weighing applications. Our Technical Services team specializes in process control, material handling, and data management applications. Around the world, we deliver customized solutions that ensure efficient and cost-effective ways of doing business.
